

## OBJECTIVE

This is a low risk portfolio which uses a conservative allocation to growth investments to achieve its objectives. The portfolio is generally aimed at the risk averse investor, or those investors with a short time horizon (3 years). Capital drawdowns are specifically minimised over 12 month horizons. Focus is given to minimising portfolio costs as an efficient way to enhance the net yield to clients. The portfolio is able to invest up to 30% offshore, however is cognisant of the additional volatility which the currency exposure brings to the portfolio.
